

Step 1 : Start

Step 2 : Declare integer variable num, sum & R

Step 3 : Read Input the value of num

Step 4 : Initialize $sum \leftarrow 0$

Step 5 : $num > 0$

$R = num \% 10$ (extract last digit)

$sum = sum + R$

$num = num / 10$

Step 6 : Print sum

Step 7 : End

Begin

Num num, Sum, R
Display "Enter a number:"
Input num

Sum $\leftarrow 0$

while num > 0 DO

~~R $\leftarrow 0$~~ R $\leftarrow$ Num $\% 10$

Sum $\leftarrow$ Sum + R

num $\leftarrow$ num / 10

End while

End Display Sum
