

Q:3

PHC

Given Data

- num-Students
- Sub1, Sub2, Sub3
Sub4, Sub5

Formulas

- Sum =
Sub1 + Sub2 + Sub3 + Sub4 + Sub5
- Average = Sum / 5
- Count = Count + 1

Out Puts

Distinction

Pass, fail

Deficiency

Conditions

- Loops sum Count < num-Students
- If mark < 33, force Deficiency
- Grade Scales
7 = 80 (Dist),
7 = 60 (Pass)
< 60 (Fail)

IPO

Input	Processing Steps	Output
• num - students • 5 Subject marks	Set count = 0 num - students 2 loop while Count < num - students Input 5 Subject marks b Calculate Sum by average - If marks < 33 Print fail Else Print average → Upgrade to count = count + 1	Grading Result per students

3. Algorithm

Step 1. Start

Step 2. Set Count = 0

Step 3. Input num - students.

Step 4. If Count < num - students, Continue Else go to step 10

Step 5. Input Sub1, Sub2, Sub3, Sub4, Sub5

Step 6. Sum = Sub1 + Sub2 + ... + Sub5
Average = Sum / 5

Step 7. If marks < 33 Print Fail Subject Deficiency

Step 8. Check Grade Tiers

If Average $\geq$ 80 Print Distinction
Else If Average $\geq$ 60 Print Pass
If " < 60 Print fail

Step 9. Count = Count + 1

Step 10 Go to Step 3

End

Pseudo code:

Begin

Set Count = 0

Input num - students

while Count < num - students DO

Input Sub1, Sub2, Sub3, Sub4, Sub5

Set Sum = Sub1 + Sub2 + Sub3 + Sub4 + Sub5

Set Average = Sum / 5

If Sub1 < 33 or Sub2 < 33 or Sub3 < 33 or Sub4 < 33 or Sub5 < 33 :

Display Fail

Else If Average ≥ 80 then Distinction

Else If Average ≥ 60 then Pass

Else If Average < 60 then Fail

Set Count = Count + 1

End If

End while

End
